

CSCI 420 Computer Graphics
Lecture 25

Virtual Reality

History of Virtual Reality
Flight Simulators
Immersion, Interaction, Real-time
Haptics

Jernej Barbic
University of Southern California

1

Virtual reality

“computer-simulated environments that can simulate physical presence in places in the real world, as well as in imaginary worlds”

U.S. Navy personnel using a VR parachute trainer
Source: Wikipedia

2

Virtual reality

- One of the “hottest” R&D areas today
- Applications
 - medical training, future surgery?
 - interior design, civil engineering
 - videoconferencing
 - exploration of future worlds
 - ethics, philosophy, psychology, who am I, and what are we?

Source: NASA

3

Virtual reality is a “hot” topic today

- Many startup companies
- Games
- Film
- Design (create 3D models, animations in VR)
- Social networks

Oculus VR

4

14 grand challenges in engineering (by the US National Academy of Engineering)

- Make Solar Energy Economical
- Provide Energy from Fusion
- Develop Carbon Sequestration Methods
- Manage the Nitrogen Cycle
- Provide Access to Clean Water
- Restore and Improve Urban Infrastructure
- Advance Health Informatics
- Engineer Better Medicines
- Reverse-Engineer the Brain
- Prevent Nuclear Terror
- Secure Cyberspace
- Enhance Virtual Reality
- Advance Personalized Learning
- Engineer the Tools of Scientific Discovery

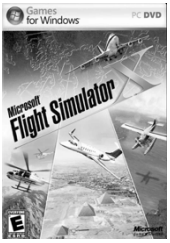

5

History of virtual reality

- 50+ years of history

Link Trainer, 1929
(over 500,000 pilots trained)

Source: Microsoft

6

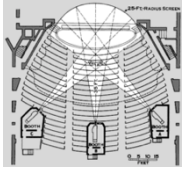

Cinerama

- Expand movie-going experience by filling a larger portion of the audience's visual field
- Required special cameras to film
- Proved too costly to be embraced by most commercial theaters

"The biggest new entertainment event of the year." - LIFE

1950s

Source: Wikipedia

7

Cinerama

How the west was won, 1962 (John Ford)

8

Virtual reality and film

- VR heavily influenced by film techniques
- Hollywood, from early 1950s

1982

2009

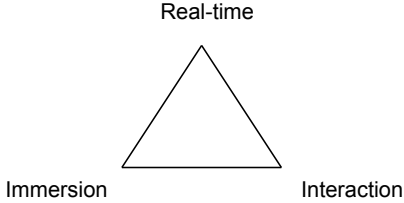

9

Avatar (2009)

10

The virtual reality triangle

11

Immersion

- The feeling of "being there"
- User becomes part of the simulated world
- Rather than the simulated world being a feature in the user's world

12

Interaction

- Possibility of moving in the virtual space and manipulate objects
- Without it, illusion breaks down quickly

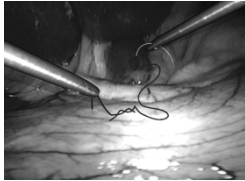

World of Warcraft

13

Real-time

- Actions should immediately affect the world
- Computers must simulate the world
- Huge computational burden
- Large computer science challenges

Virtual suturing
Source: Surgical Science

14

Head-mounted displays

- Requires **rapid** update rates (min 30 fps, preferably 60 fps)
- very fast tracking and redisplay
- short lag times
- no noticeable delay between movement and production of correct visuals
- if these are not satisfied => **simulator sickness**

Source: Atticus Graybill of Virtually Better, Inc.

15

Head-mounted displays

Oculus Rift (Facebook)

Google Cardboard (Google)

HTC Vive (HTC and Valve)

16

Cave

- Project 3D CG into a cube with displays surrounding the viewer
- Coupled with head tracking systems (and other tracking systems e.g. hand)
- Usually surround audio feedback
- Viewer explores virtual world by moving and interacting in the virtual environment

Source: Dave Pape

17

Augmented reality

- Enhances your reality with graphics, haptics, sound

Source: bestofmicro.com, cultofandroid.com

18

Augmented reality headsets

Microsoft HoloLens (Microsoft)

Magic Leap (Magic Leap, Google)

19

Virtual reality "hardware"

20

Flight simulators

- Key driving force of virtual reality technologies
- US Air Force, NASA
- Friend/foe identification
- Targeting/threat information
- Optimal flight path

Source: NASA

21

Flight simulators

- Must manage and render the virtual world
- Shadows and textures
- Motion and force feedback
- Professional flight simulators are still very expensive (millions of \$)

Thales flight simulator

27

Haptic interfaces

- hap-tic ('hap-tik)
adj.
Of or relating to the sense of touch; tactile.

28

Force-feedback rendering

Phantom 3-DoF device
(Sensable)

Force-feedback mouse
(Immersion)

29

Force-feedback rendering

Barbič and James 2007

Simulation in games

Silent Hunter 4 (Ubisoft)

32

Discussion

- Can we simulate anything?
- What is reality?

Why virtual worlds?
