Computer Animation and Simulation

About the teacher

- Assistant professor in CS
- Post-doc at MIT (2 years)
- PhD, Carnegie Mellon University
- jnb@usc.edu

About the teacher

- Background:
BSc Mathematics
PhD Computer Science
- Research interests:
graphics, animation, real-time physics,
control, sound, haptics

Teaching Assistant

- Yili Zhao
- Tuesday, 1:00-3:00pm
- SAL 235

Who is the course for

- PhD students
- MSc students
- Advanced undergraduates

- CS 580 background will be very helpful !!

Why take this course

- Opens the door to jobs in computer graphics
- Make better games
- Put math and physics to use in the real world
- Real-time graphics is cool
- Impress your friends with demos

SIGGRAPH2010

Prerequisites

- A grade of at least B in CS480 or CS580, or explicit permission of instructor
- Familiarity with calculus, linear algebra and numerical computation
- C/C++ programming skills
- See me if you are missing any and we haven't discussed it

Recommended Textbooks

- **Rick Parent: Computer Animation, Second Edition: Algorithms and Techniques**
- **OpenGL Programming Guide (“Red Book”)**
Basic version also available on-line (see [Resources](#))

Evaluation

- Assignments: 3 x 21%
- Final Exam: 37%

Academic integrity

- **No collaboration!**
- Do not copy any parts of any of the assignments from anyone
- Do not look at other students' code, papers, assignments or exams
- USC Office of Student Judicial Affairs and Community Standards will be notified

Assignment Policies

- Programming assignments
 - Hand in via Blackboard by end of due date
 - Functionality and features
 - Style and documentation
 - Artistic impression
- 3 late days, usable any time during semester
- Academic integrity policy applied rigorously

Class goals

- Gain ability to create animations and 3D simulations
- Learn a 3D graphics API (or improve skills)
- Improve code optimization skills

Applications

- Virtual reality
- Interactive computer animation
- Surgical simulation; preoperative planning
- Computational robotics; manipulation
- Video games
- Assembly planning
- Scientific visualization
- Education
- E-commerce

Force-feedback Rendering

Haptic Interfaces

- hap·tic ('hap-tik)
adj.
Of or relating to the sense of touch; tactile.

Multibody dynamics

Figure 1: *Avalanche*: 300 rocks tumble down a mountainside.

TOPICS TO BE COVERED:

- Overview of computer animation
- Primer on numerical linear algebra
- Dynamical systems, numerical integration of ODEs
- Constraints and contact
- Character Rigging
- Inverse Kinematics
- Maya
- Crowds
- Rigid body dynamics
- Collision detection
- Structured deformable objects (solids, cloth, hair)
- Fracture and cutting
- Fluids (Navier-Stokes)
- Haptics
- Sound simulation (acoustics)
- Programmable graphics hardware (GPUs)
- Case study: Havok engine for physics in games
- Motion capture

CSCI 520
Computer Animation
and Simulation
